INSTALLATION

▲ CAUTION

- To prevent burns, allow the engine, exhaust system, radiator, etc., to cool before installing the accessory.

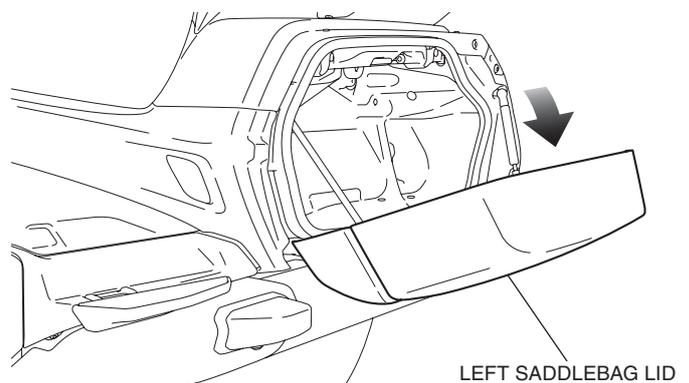

NOTE:

- Disconnect the negative (-) cable from the battery before installing this accessory.
- Heat the bonding surfaces with a hair dryer if the ambient air temperature is below 70°F (21°C).
- The adhesive reaches full strength in 72 hours. Wait at least 24 hours before riding your motorcycle.
- The memories of the clock will be erased when you disconnect the battery. Reset the memories after reconnecting the battery.
- Reinstall the removed parts on the motorcycle and make sure that the wires and harnesses are not pinched.
- Trim the excess ends off the wire ties after attaching them to the wire harnesses. Do not allow the cut part of the wire tie to interfere with another harness or brake hose.
- For installation of trunk inner lamp and LED high mount stop, refer to the installation instructions for the each accessory.

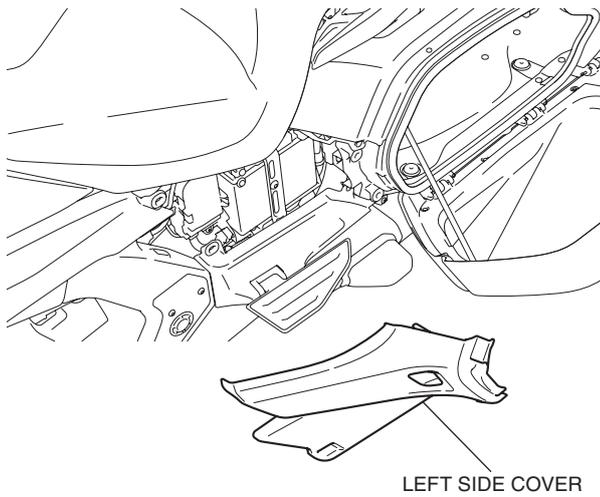

- Open the left saddlebag lid as shown.

- Repeat on the right side.

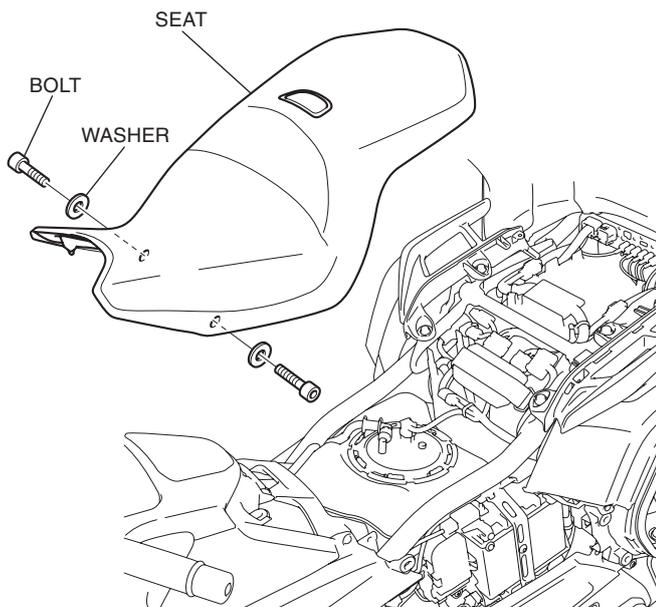

<Left side>

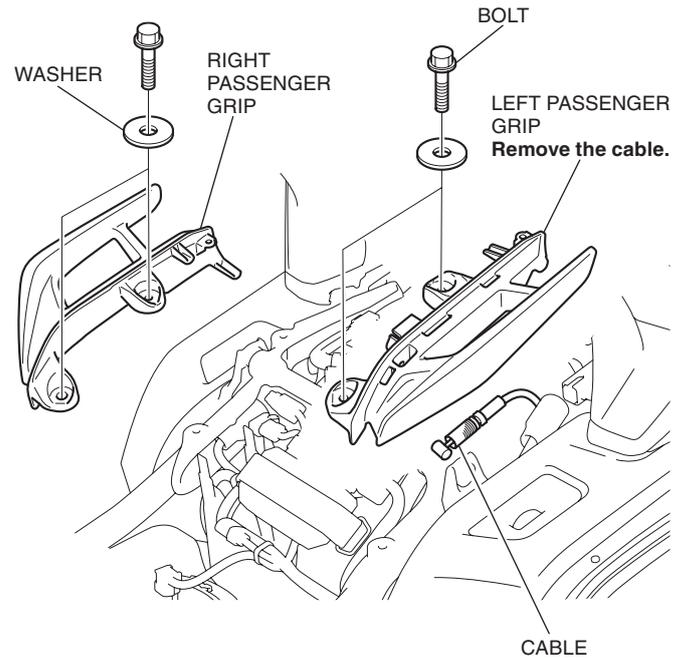

2. Remove the left side cover as shown, and disconnect the negative (-) cable of the battery.

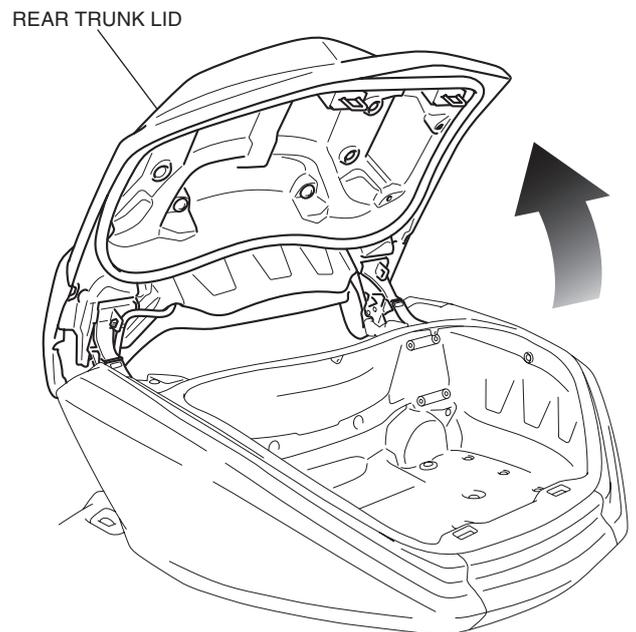

3. Remove the right side cover in the same manner as the left side.
